

World Peace Day Program

Agenda and Program Details

Core Agenda. The core agenda of the World Peace Day Program is to bring together diverse communities, cultures, and individuals through meaningful conversations, collaborative activities, and community-led events that promote the values of peace, unity, inclusion, and harmony.

1 Community Engagement and Pre Events

Leading up to the main celebration, we will organize a series of small-scale programs and activities in collaboration with multiple communities across different parts of India. Each community will contribute through its own area of work, perspectives, and cultural identity, creating opportunities for dialogue, learning, and collective participation.

2 Celebrating India's Diversity

The programs will take place across multiple locations in India and showcase the richness of our cultural diversity. Through art, music, dialogue, youth engagement, and community participation, these events will highlight how people from different backgrounds can come together with a shared purpose.

3 Building Connections Across Communities

The initiative aims to create meaningful connections between communities working on different social and cultural themes, encouraging collaboration and shared learning beyond individual events.

4 The Grand World Peace Day Celebration

The journey will culminate in one major program where participating communities come together on a common platform to collectively celebrate World Peace Day. The main event will bring together the diverse voices, experiences, and cultural expressions developed through the preceding community engagements.

Overall Vision

To create a collective movement where India's diversity becomes a strength for building unity, dialogue, and peace, demonstrating how communities can come together, celebrate their differences, and contribute collectively to the larger vision of World Peace.
